# Our Business

onetoone Business Interiors has been supplying office furniture and handling all aspects of commercial interior design for over 10 years. Last year we worked with over 100 clients undertaking office refurbishment and complete fit out projects. To see examples of projects we have fulfilled, please take a look at our case studies, which can be viewed on our website, [www.onetoonebusinessinteriors.com](http://www.onetoonebusinessinteriors.com).

As professionals in the refurbishment and fit out of business premises, our staff are carefully selected and come from a range of different backgrounds and disciplines, e.g. construction, interior design, engineering and commerce. Each client is assigned a project manager who will hand select a team of individuals with the skills, experience and product knowledge required to improve your workspace.

We work directly with clients, architects and contractors undertaking projects of various sizes, from the simple redesign of a small office, to the complete refurbishment or re-fit of a major office development.

As an independent business, we are not tied to any single furniture provider and we are free to source furniture from an exciting range of brands. We work with the most reputable furniture manufacturers in the industry, those who share our commitment to quality, innovation and outstanding service.

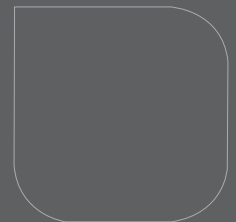

# Space Planning & Design

Effective space planning is not just about maximising the number of workstations in the office, but is about creating the perfect office environment. It is just as important for your office to create a good first impression on visitors as it is to create an effective working environment for staff where they will be happy, motivated and productive.

Our space planners use CAD technology to produce 2D plans and 3D models of your office. Our 3D models let you do virtual walkthroughs, viewing your office designs from various angles. Before building work commences, you can experiment with different layouts, furniture and finishes.

# Refurbishment Solutions

What differentiates onetoone Business Interiors from the competition is that we are a total solutions provider. We do not simply supply office furniture, but provide a full range of products and services required for a complete office fit-out or full refurbishment project. We have a team of specialists to handle all the building, structural, mechanical and electrical requirements of each job.

## Partitions

Our office interiors team will show you the latest, most versatile office partitioning systems to help you divide your office space and create your ideal environment.

## Storagewall

Storagewalls divide office space and as they utilise the full height and width of any given space, they often provide more storage and filing capacity than conventional cupboards.

## Flooring

From durable office flooring for a busy office, to luxury pile carpet for the board room, onetoone Business Interiors supply and fit a range of commercial flooring solutions including carpets, carpet tiles, vinyl floor, hardwood and laminates.

## Air Conditioning

Our specialists will help you find the most practical air conditioning system for your commercial premises.

## Move Management

Our move management, or business relocation service, ensures your office move takes place with the minimum of disruption.

## Ceilings & Lighting

onetoone Business Interiors can source and install ceiling systems to suit all budgets and demands for performance.

## Mechanical & Electrical

We have a team of experts who can co-ordinate the mechanical & electrical element of any project including power & data, heating & air conditioning systems

# Sustainable Workplaces and Offices

onetoone Business Interiors will help you create a sustainable office. 'Green Design' is something that we have very much in mind when specifying the products within your office. Whether we use materials that are sustainable or environmentally friendly, or whether the processes of manufacture are ecologically sound, it all helps to contribute.

Reducing the energy loads and providing this energy efficiently help, as does keeping the work practices to a minimum. Through the use of energy efficient materials in lighting, partitioning, ceilings and elsewhere we reduce the footprint that your office will leave.

We will not over specify your building and will take into account any future flexibility that you may need. Everything will ideally be replaceable with minimum cost and effort so that your office will continue to be environmentally friendly. At the same time we will provide for the health and safety of your employees.
